Debriefing
UNEA-2
Batumi Ministerial Conference

Ivonne Higuero
Chief of Section, Environment Division, UNECE
Group of Experts for the list of voluntary possible actions
The suggested actions are clustered according to their scope, i.e. economy-wide and sectoral. In addition, since cities also play a key role in the green transition, the framework suggests actions that can help make them smarter, more resource efficient and inclusive.

- Priority sectors for greening the economy in the region include:
  - (a) Agriculture, forestry, fishing;
  - (b) Energy and mining;
  - (c) Manufacturing;
  - (d) Transport;
  - (e) Water;
  - (f) Waste;
  - (g) Tourism; and
  - (h) Housing, buildings and construction.
