

The **Geneva Environment Network** & the **OneFuture-One Planet Project**
cordially invite you to the next

Dialogue - connect, envision, engage, reflect and share

The GLOBAL DIALOGUES Geneva

Thursday 19 April, 13:30-16:30

International Environment House II, 7 ch. des Anémones

The 'Global Dialogues' is an International Initiative that brings together individuals, organisations, networks and countries from all over the world in a shared intention to envision and create together a future and society where people and Nature flourish together. **The Global Dialogues** are held all over the world in the build up to two important International Conferences: **Stockholm+40** in April and **UN Conference Rio+20** in June. An International report, combining all the country reports will be presented to the UNCSO during Rio+20 in June. The aim of these dialogues is to inform and guide world leaders at these conferences, to take decisions in line with what we, as a society, want to create together.
