The cruise

How does Geneva recover and treat its household and special waste?

We invite you to join us for a unique river cruise along the Rhone to discover a hidden side of Geneva.

Two-thirds of the city's urban waste, approximately 75,000 tonnes per year, are transported by water from the centre of Geneva to the Cheneviers waste processing and recovery plant.

We are offering you the chance to travel the 12 km long waste route on a barge specially fitted out for the occasion and to discover the natural wealth of the Rhone as far as the Cheneviers plant, followed by a guided tour of the installations. An exceptional cruise, combined with organised activities and an opportunity to savour regional specialities.

Welcome aboard!

Schedule

10.30 Start of the cruise
