- Global unemployment overall: 200 million
Trend: + 27 mln. since 2008/9
- 600 million productive jobs needed over the next decade

Recall:

Green jobs are Decent jobs which..

- ✓ Reduce consumption of energy and raw materials (**dematerialize economies**)
- ✓ Avoid greenhouse gas emissions (**decarbonize economies**)
- ✓ **Minimize waste and pollution**
- ✓ **Protect and restore ecosystems** and environmental services
- ✓ **Help adapting to climate change**

Creating new green jobs... and making existing jobs greener

Demand side

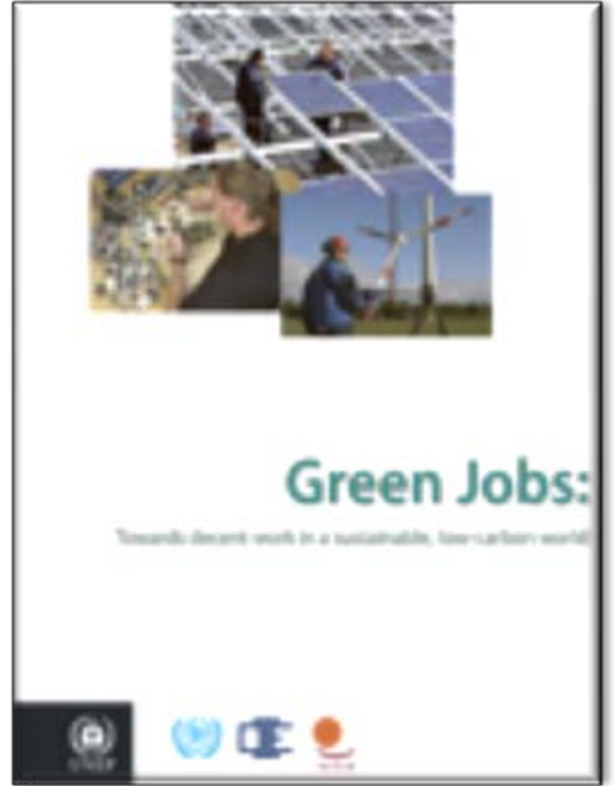

- Mobilizing investment in green sectors
- Creation of job opportunities in sustainable infrastructure and natural resource management (mainly public sector, but combined with green procurement policies)
- Promoting green entrepreneurship and business mentoring

Supply side

- Career guidance at early stages
- Development of relevant and portable skills for green jobs in TVET
- Acquisition of work experience in sustainable enterprises and green value chains,
- Active labour market intermediation (Jobs Fairs, The Green Jobs Programme of the ILO social media)

The Green Jobs Initiative

The Green Jobs Programme of the ILO
