ABOUT THIS SESSION

You are cordially invited to the Plastics and Health session of the Geneva Beat Plastic Pollution Dialogues, organized by the Geneva Environment Network in partnership with the Basel, Rotterdam and Stockholm Conventions, the Center for International Environmental Law, the Global Governance Centre at the Graduate Institute, Norway, and Switzerland.

The Geneva Beat Plastic Pollution Dialogues aim to facilitate further engagement and discussion among the stakeholders in International Geneva and beyond. They also intend to address the plastic crisis and support coordinated approaches that can lead to more efficient decision making. This session is the second dialogue to be organized leading to and making recommendations towards the High-Level Plastic Governance Dialogue in February 2021.

Research has shown that exposure to plastic is expanding into new areas of the environment and the food chain. Leading experts will discuss the most recent research findings on the impacts of plastics on our health and the current processes ongoing at the global level to address the issue.
