

The Core Group Climate Change and Health and the International Geneva Global Health Platform would like to invite you to

## Launch Event - Towards a New Resolution on Climate Change and Health

The impact of climate change is the greatest global health threat of the 21st century, whilst paradoxically the healthcare sector and its supply lines is negatively impacting climate change. We need to take action to adapt and mitigate this impact. At this event you'll find out what challenges lie ahead and what steps we can take, from the perspective of science, non state actors, government, intergovernmental organizations and youth. To take forward in the process towards a new Climate and Health Resolution to be adopted at the 77th World Health Assembly.

The event will be moderated by Prof. Gian Luca Burci - Global Health Centre, Geneva Graduate Institute
